AMENDMENT

Dear Sir:

In response to the Office Action mailed June 2, 2000, please enter this amendment and consider the following remarks.

IN THE CLAIMS

15. (Amended) An apparatus that generates an output signal in response to a view changing comprising:

a memory to store a property of one or more frames representing the view at different times; and

a processor coupled to the memory to compare the property of two frames to each other and to generate the output signal in response to the property of the two frames
